Written By: Tobias Isakeit

INTRODUCTION

This guide will show you how to replace the camera module of the Fairphone 2.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)

PARTS:

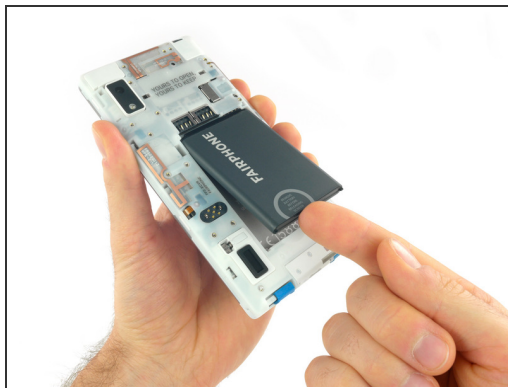

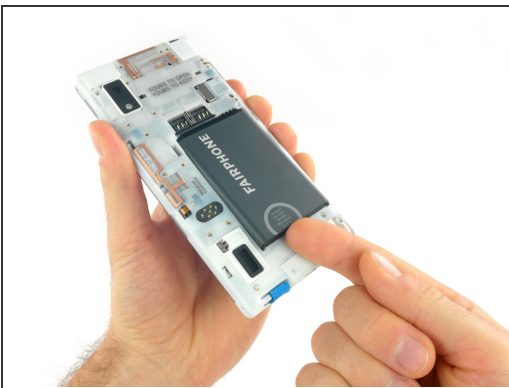

- [Fairphone 2 Rear Camera Module](#) (1)

Step 1 — Back Cover

- Just peel off the back cover by starting at one of the corners and work your way around.
- Take off the back cover.

Step 2 — Battery

- Push the battery toward the top of the phone.
- Pull the battery out away from the phone.

Step 3 — Display Assembly

- After taking out the battery you can unlock the display assembly.
- Flip the two blue switches to the inner position.
- Slide the display assembly towards the bottom of the phone.

Step 4

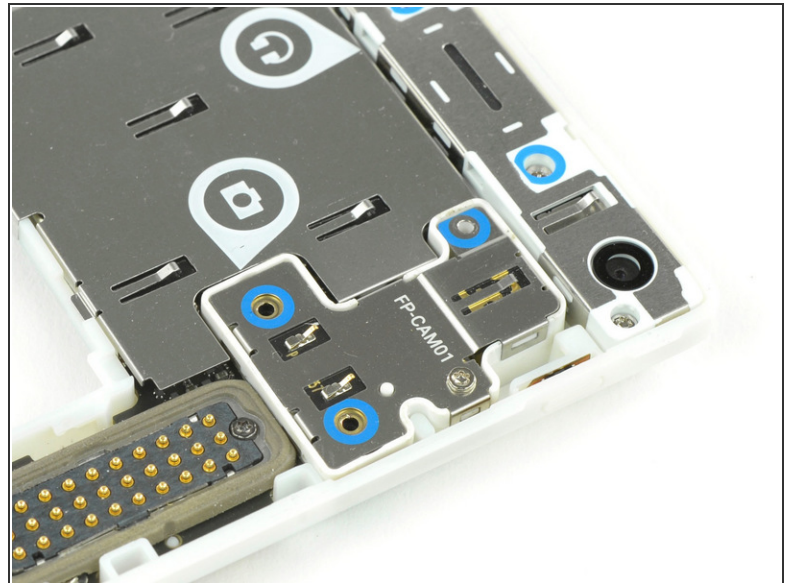

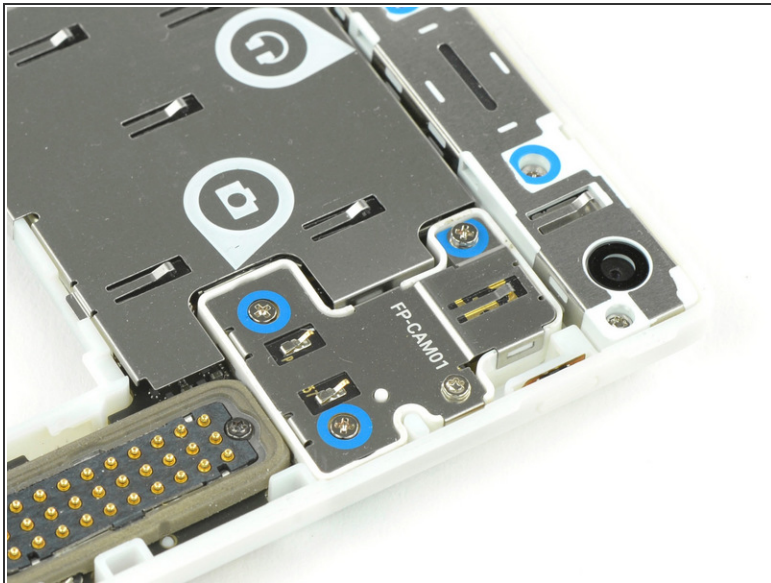

i Another possible way of sliding the display assembly open.

Step 5

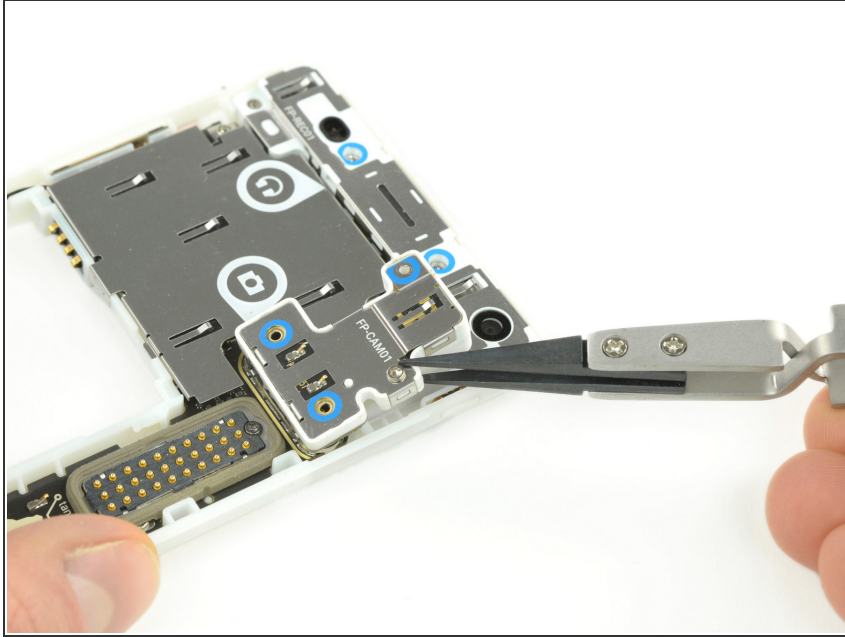

- Take off the display assembly.

Step 6 — Rear Camera Module

- Remove the three Phillips #0 screws of the module which are nicely marked by the blue circles.
- ⓘ Now the module should stand off a little bit due to the pogo pins underneath.

Step 7

- Take out the whole module.

To reassemble your device, follow these instructions in reverse order.
